

Topic: Water cycle

water cycling in air and temperature  
is about:

# The Frame

Main idea:  
precipitation

Main idea:  
evaporation

Main idea:  
condensation

Essential Details:  
snow

Essential Details:  
sun heats water

Essential Details:  
surface has a  
lower temperature

freezing temperature 32 degrees F

vapor

clouds

water droplets

rain

So What? (What is important to understand?) Know where water comes from and predict where it is going

Topic: Water Cycle

# The Frame

is about: Water cycling in air and temperature.

Main idea:

Precipitation

Main idea:

Vapor

Main idea:

Condensation

Essential Details:

Snow

Essential Details:

Sun heats water

Essential Details:

Surface has a lower temperature,

Freezing temperature 32 degrees F.

Vapor

Clouds

Water droplets

Rain

So What? (What is important to understand?): Know where water comes from the predict where it is going.

## The Framing Routine

The non-fiction texts are chosen based on the topic of study in science like the water cycle, conservation or fossils. Students are grades 9 through 12 with intellectual disability and autism.
